### KEY OPTIONS

- Top Hat cab with walk-through cab-access door
- Standard-height cab-access door
- Translucent roof
- Master Lock® security system
- Aluminum ladder rack

### MY SPARTAN

"My truck is my business. I told my salesperson I needed curbside compartments, no driver-side compartments,

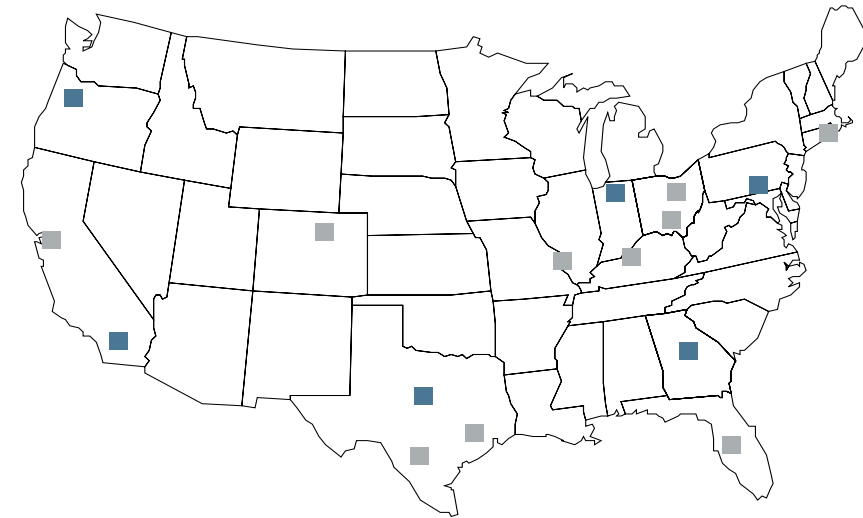

and full-length shelves on the driver's side. They created the truck to my specifications." ■

Supreme Corporation, a publicly held company (American Stock Exchange, symbol: STS), was founded in 1974. Since that time, we've become the nation's leading full-line manufacturer of customized, general-purpose truck and bus bodies. We've done so by building a reputation for strict quality standards, aggressive product innovation, and uncommon responsiveness to our customers' needs.

Supreme is a vertically integrated manufacturer, a strategy that allows for better control of the cost, quality, and availability of materials. Our technologically innovative fiberglass-reinforced plywood (FRP) plant in Ligonier, Indiana, combined with our fiberglass molding and fabrication facilities, creates cost efficiencies, allows us total quality control, and provides material availability that other body builders cannot match.

Supreme employs more than 2,000 people at six manufacturing plants and ten service centers throughout the United States, each fully dedicated to surpassing our customers' expectations.
