Spartan® Strongbox

YOUR VEHICLE IS YOUR BUSINESS

When your company is on a job site, time is money – so you want every tool you need at your fingertips. That's why you should choose the Spartan inspired Strongbox. An unlimited selection of compartments, shelves, doors, and more make the Spartan Strongbox your workshop on wheels for job-site protection from the weather while offering a secure, lockable workspace.

Available in five body lengths and four heights, you choose the Strongbox body size that meets the needs of your business. Our wide interiors allow you to carry large loads – even cumbersome cargo like plywood or sheetrock.

The Spartan Strongbox is filled with standard features designed to make your job easier. Non-corrosive fiberglass reinforced plywood (FRP) construction brightens the interior of the cargo area and compartments. Horizontal compartment door opens into a sturdy workbench, perfect for your on-site needs. Durable aluminum lined compartment doors with automotive door seals and stainless steel hinges are standard. Spacious front compartment handles shop vacs, plumber's snakes, and more. A low 10 inch poached rear bumper makes it easy to get in and out of your Strongbox.

BUILT TOUGH, BUILT DURABLE, BUILT RIGHT.

Strongbox bodies are built tough and durable, with a 3/8" fiberglass reinforced plywood (FRP) body and a 2" x 6" pine floor. Both give you maximum endurance. Roofs are made with .032 aluminum, with FRP or translucent roofs available as options. All eliminate corrosion. Plus, Strongbox is built right,

with many options and choices to fit your specific needs. With lots of standard features that other manufacturers don't even offer and more interior space than a standard cargo van. An optional fully enclosed interior will provide you with a protected work area. A 10"-deep perforated low bumper is also standard. And, compartments and shelves can be configured in many ways to improve the organization of your tools and parts.

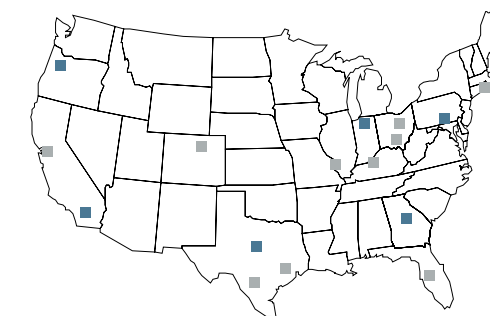

Plus, Strongbox is built right, offering flexible features and options to keep your work vehicle uncluttered and ready to go. Adjustable interior shelves allow you to keep your equipment well organized so you can always find the right tool when you need it. Sliding, reach through Plexiglas doors offer easy access to your most commonly used tools. Add an aluminum ladder rack for rust-resistant ladder storage. And if you are hauling longer cargo like PVC pipe or conduit, a rear pipe door allows for quick loading and storage.

THE RIGHT COMBINATION.

The Spartan Strongbox combines the rock-solid ruggedness of a quality Chevrolet chassis with the versatility and quality of a Supreme body. Together, they've been engineered to deliver maximum efficiency, economy and durability. And with the diversity shown in the Spartan line, you're bound to find the right combination to fit your needs.
